

# We Switch Europe ON!

## Our aim

## A Climate Neutral and Jobs-driven Europe

Electrical contractors are invested in electrification, renewables, energy efficiency and e-mobility. We are part of the #EUGreenRecovery mobilisation to rebuild Europe with green and skilled jobs contributing to ambitious climate targets.

## Powered by

## Electrification in Buildings and Transport:

- energy efficiency and flexibility
- distributed renewable sources
- battery electric storage systems
- reduced air and noise pollution
- consumer empowerment
- synergies and mutual advantages

## Enabled by

## Digitalisation

Electrification calls for digitalisation to: make buildings smarter and transport more efficient, improve the quality of information and enhance maintenance operations.

## Skills

Modern skills and higher-skilled workers are crucial for making the Energy Transition a reality while fostering electrical safety and sustainable growth. We campaign for #Skills4Climate.

EuropeOn: rue d'Arlon 69-71 1040 Brussels, Belgium. Tel: +32 (0)2 253 42 22. Email: info@europe-on.org [europe-on.org](http://europe-on.org)

**1.8 million**  
professionals across Europe  
**= 1 in 134**  
European workers

**300,000**  
Companies  
Mainly local companies and SMEs, we are the day-to-day link between the energy industry and the end-users

**€ 200**  
billion  
of turnover

**Energy, Climate, Renovation and Construction, Mobility** are the policies we address, and which imply **Fast-Evolving Skills**
